10-port 10/100Mbps PoE Switch

(GWS-1108PLS)

Overview

The GWS-1108PLS is a 10/100Mbps unmanaged PoE switch. It has 8*10/100M PoE ports and 2*10/100M RJ45 ports. Port 1-8 can support IEEE802.3af/at PoE standard. Single port PoE power up to 30W. As a PoE power supply device, it can automatically detect and recognize the power receiving equipment that meets the standard and supply power through the network cable. It can supply power to POE terminal equipment such as wireless AP, webcam, VoIP phone, video access control intercom, etc. through a network cable to meet the network environment that needs a high-density PoE power supply. It is suitable for hotels, campuses, factory quarters, and small and medium-sized enterprises to form an economy-efficient network.

Unmanaged mode, plug and play, no configuration, easy to use.

Feature

■ **10/100Mbps access, Dual RJ45 port uplink**

◇ Support non-blocking wire-speed forwarding for smoother transmission.

◇ Support IEEE 802.3x full-duplex flow control and Backpressure half-duplex flow control.

◇ Provides 8*10/100Base-TX RJ45 ports for flexible networking and meets the networking requirements of various scenarios.

■ **Intelligent PoE power supply**

◇ IEEE802.3af/at PoE standard, without damaging non-PoE devices.

◇ 8*10/100Base-TX RJ45 ports, meeting the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.

◇ Priority system for PoE port, it will supply power to the high priority level port first when the power budget is insufficient and avoid overwork of the device.

■ **Innovative function**

◇ **EXTEND mode (250m):** The speed of ports 1-8 is reduced to 10M when it is turned on, and the existing twisted-pair cable can be used to break through the limit of 100-meter transmission of twisted-pair cable, and the maximum transmission distance can reach 250 meters. On the other hand, It can solve the problem of poor transmission caused by line aging.

◇ **VLAN mode:** enabled together with the EXTEND mode, port 1-8 are isolated from each other but all communicate with port 9-10, which can prevent DHCP conflicts, optimize port cache utilization, and reduce broadcast storms.

  (**Note:** When the function switch is toggled to 250m mode, the port 1-8 extend transmission and port VLAN isolation function are enabled at the same time.)

■ **Stable and reliable, easy to use**

◇ CCC, CE, FCC, RoHS.
◇ Plug and play, no configuration, simple and convenient.

◇ Low power consumption, galvanized steel casing, no fan.

◇ The user-friendly panel can show the device status through the LED indicator of PWR, PoE.

Ordering Information

Model	Description	Built-in Power Supply
GWS-1064PLS	Unmanaged PoE Switch with 4*10/100M RJ45 ports and 2*10/100M uplink RJ45 ports. Port 1-4 support IEEE802.3af/at PoE standard. Adjust the functional switch, can realize port 1-4 VLAN isolation and 10M/250 meters extend transmission. Built-in power supply.	65W/52V
GWS-1108PLS	Unmanaged PoE Switch with 8*10/100M RJ45 ports and 2*10/100M uplink RJ45 ports. Port 1-8 support IEEE802.3af/at PoE standard. Adjust the functional switch, can realize port 1-8 VLAN isolation and 10M/250 meters extend transmission. Built-in power supply.	120W/52V
Note: Default wall-mounted installation does not include mounting ears. If need to configure it, need to purchase it separately.
